Our problem statement is about Expense Tracker, discussing this problem we team members came out with few solutions out of all the solutions we discussed we are here going to upload the top three ideas.

IDEA 1:

To reduce manual calculations, we propose an application. This application allows users to maintain a digital automated diary. Each user will be required to register on the system at registration time, the user will be provided id, which will be used to maintain the record of each unique user.

IDEA 2:

Expense Tracker application which will keep a track of Income-Expense of a user on a day to day basis. The best organizations have a way of tracking and handling these reimbursements. This ideal practice guarantees that the expenses tracked are accurately and in a timely manner.

IDEA 3:

From a company perspective, timely settlements of these expenses when tracked well will certainly boost employee's morale. Additional feature of Expense and income prediction helps to better budget management.
